

🔵 Net Protect Antivirus (NPAV) – Client Setup Guide

⚠️ Important Pre-Installation Instructions

- If **any other antivirus** is already installed on your computer:
 1. Uninstall the existing antivirus completely.
 2. **Restart your computer.**
- Only after restart, proceed with NPAV installation.

📄 Step 1: Download Setup File

1. Open your web browser.
 2. Visit the official download page:
👉 <https://online.jau.in/av>
 3. Click on Download NPAV for All PC Button
 4. Download the **NPAV setup (.exe) file** to your computer.
-

▶ Step 2: Run the Setup File

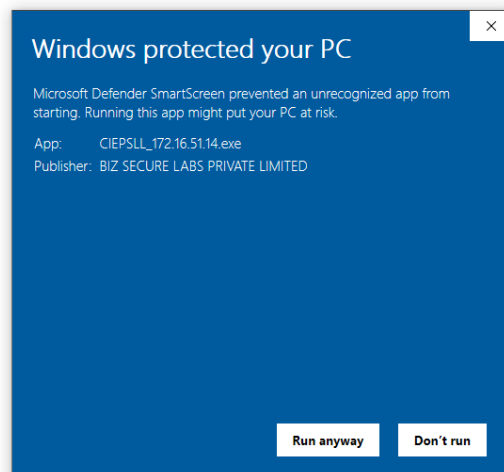

1. Locate the downloaded **NPAV .exe file**.
 2. Double-click on the file to start installation.
-

▶ Step 3: Handle Windows Security Prompt

If you see a message:

“Windows protected your PC”

- Click on **More info**
- Then click **Run anyway**

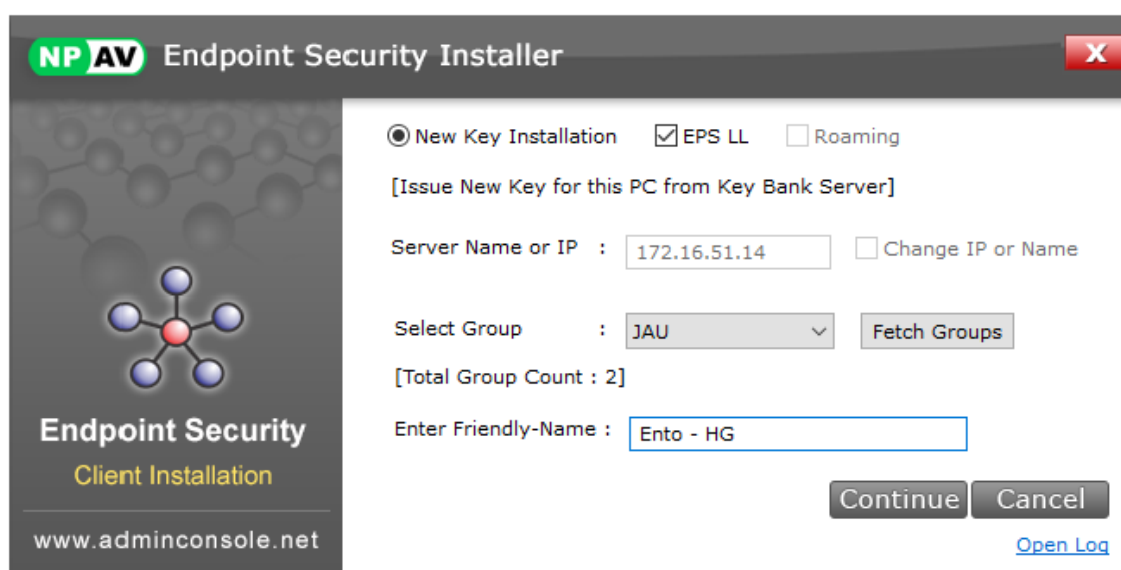

⚙️ Step 3: Follow Installation Instructions

1. The setup wizard will open.
 2. Click **Next** and follow the on-screen instructions.
 3. Accept terms and proceed until you reach configuration steps.
-

👤 Step 4: Select Group Configuration

During installation, you will see a screen asking for **Group Selection**:

1. Click on **Fetch Groups**
2. From the dropdown list, select:
👉 **JAU**
3. In the **Friendly Name** field, enter a name in this format:
👉 *DepartmentName-BranchName*
(Example: ITC-TECH-4)
4. Use correct **Friendly Name format** for proper identification.

5. Click **Continue** and follow the on-screen instructions.
 6. Click on Yes on “Do You Want to Continue Installation?” message.
-

🚀 Step 5: Complete Installation

1. Continue clicking **Next** until installation completes.
 2. Click **Finish**.
 3. The antivirus will initialize and start protection automatically.
-

Step 6: Verify Installation

- Ensure NPAV icon appears in the system tray (bottom-right corner).
 - Open the application to confirm it is **active and updated**.
-

Important Notes

- Ensure internet connection is active during installation.
- Contact your IT support team if you face any issues.
